WHEAT: The outlook for 2018/19 U.S. wheat this month is for unchanged supplies but reduced exports and domestic use. The NASS *Grain Stocks* report, issued March 29, implied less feed and residual use for both the second and third quarters. Total 2018/19 feed and residual use is lowered 10 million bushels to 70 million. Wheat exports are lowered 20 million bushels to 945 million on a continued sluggish export pace. By class, Hard Red Winter exports are raised 10 million bushels, which is offset by reductions of 15 million for Hard Red Spring, 10 million for White, and 5 million for Durum. These demand changes, as well as a small reduction in seed use, led to a 31.5-million-bushel-increase in ending stocks, which are now projected at 1,087 million bushels. The season-average farm price is raised \$0.05 per bushel at the midpoint to \$5.20 based on updated NASS price and marketing data.

World 2018/19 wheat supplies are raised 2.1 million tons due mainly to increased beginning stocks that largely reflect multi-year revisions for Iran. Global production and exports are each reduced fractionally, but domestic consumption is lowered 2.9 million tons. The consumption change stems primarily from lower Iran and EU feed and residual use; Iran is lowered on the series revision and the EU reduction is based on more competitive corn prices and increased coarse grain disappearance. With supplies increasing and total use declining, global ending stocks are raised 5.1 million tons to 275.6 million.

COARSE GRAINS: This month's 2018/19 U.S. corn outlook is for lower feed and residual use, reductions in corn used for ethanol and exports, and larger stocks. Feed and residual use is lowered 75 million bushels to 5.300 billion based on corn stocks reported as of March 1, which indicated disappearance during the December-February quarter declined about 9 percent relative to a year ago. Corn used to produce ethanol is lowered 50 million bushels to 5.500 billion based on the most recent data from the *Grain Crushings and Co-Products Production* report, and the pace of weekly ethanol production during March as indicated by Energy Information Administration data. Exports are reduced 75 million bushels to 2.300 billion, reflecting current outstanding sales and expectations of increased competition from Brazil, Argentina, and Ukraine. With supply unchanged and use declining, ending stocks are raised 200 million bushels to 2.035 billion. The season-average corn price received by producers is unchanged at a midpoint of \$3.55 per bushel.

The global coarse grain production forecast for 2018/19 is up 5.3 million tons to 1,377.2 million. This month's foreign coarse grain outlook is for larger production, increased trade, greater use, and marginally higher stocks relative to last month. Brazil corn production is raised, reflecting improved yield prospects for second-crop corn. Argentina corn is higher based on expectations of larger area. Corn production is raised for the EU, Mexico, and Indonesia, with reductions for the Philippines and Pakistan.

Major global trade changes for 2018/19 include higher projected corn exports for Brazil, Argentina, the EU, and Ukraine with a partially offsetting reduction for the United States. Corn imports are raised for the EU and South Africa, with lower projections for Vietnam and Bangladesh. Foreign corn ending stocks for 2018/19 are raised from last month, mostly reflecting increases for Mexico, Indonesia and South Africa that more than offset declines for Vietnam, Brazil, Pakistan, Bangladesh, and Argentina.

RICE: The outlook for 2018/19 U.S. rice this month is for reduced exports, unchanged domestic and residual use, and higher ending stocks. All rice exports are lowered 4.0 million cwt to 94.0 million. Long-grain exports are reduced by 1.0 million cwt to 67.0 million on lower-than-expected milled exports. Medium- and short-grain exports are decreased by 3.0 million cwt to 27.0 million on a slow sales pace to several export markets. Total domestic and residual use is unchanged at 135.0 million cwt. Long-grain use is raised 1 million cwt but this increase is completely offset by an equivalent reduction in medium- and short-grain. These revisions are based on the latest NASS *Rice Stocks* report. Projected all rice ending stocks are raised 4 million cwt to 53.6 million. This is 82 percent higher than last year and would be the first time stocks have reached 50 million cwt since 1986/87. The projected 2018/19 all rice season-average farm price is reduced by \$0.10 per cwt at the midpoint to \$12.10 with the range narrowed to \$11.80 to \$12.40. All of the reduction is due to a decrease in the projected California medium- and short-grain price.

Global 2018/19 rice supplies are decreased by 0.4 million tons to 663.8 million with lower carryin stocks and production. Global production is down as reductions for Indonesia, Pakistan, and the Philippines are not completely offset by higher production for Sri Lanka. World 2018/19 consumption is raised 0.4 million tons to 492.4 million on higher expected use in Pakistan and Sri Lanka more than offsetting reduced use in Laos and Mexico. Global 2018/19 trade is lowered marginally to 47.3 million tons as reduced exports by Pakistan, the EU, and the United States are not completely offset by higher exports from Cambodia, Peru, and Uruguay. Projected world ending stocks are adjusted lower this month to 171.4 million tons but remain record large.

OILSEEDS: U.S. soybean supply and use changes for 2018/19 include lower imports, higher seed use, and lower ending stocks. Soybean imports are reduced in line with reported trade through January while lower seed use reflects plantings indicated in the March 29 *Prospective Plantings* report. With soybean crush and exports unchanged, ending stocks are projected at 895 million bushels, down 5 million. Soybean oil changes include increased imports and domestic disappearance for biodiesel and for food use, and lower ending stocks. The season-average soybean price is forecast at \$8.35 to \$8.85, unchanged at the midpoint. Soybean oil price is projected at 28.0 to 30.0 cents per pound, down 1 cent at the midpoint. Soybean meal prices are projected at \$305 to \$325 per short ton, unchanged at the midpoint.

The 2018/19 global oilseed supply and demand forecasts include increased production, lower exports, and increased stocks compared to last month. Global oilseed production is raised 2.0 million tons to 595.0 million mainly on higher soybean production for Brazil and rapeseed production for India. Production for Brazil is increased 0.5 million tons to 117.0 million, reflecting favorable weather in Rio Grande do Sul where the crop is in pod-filling and maturation stages. Brazil's 2017/18 soybean crop is also revised higher, supported by recent industry estimates. Rapeseed production for India is raised 1.4 million tons to 8 million on information from India's Solvent Extractors' Association.

Global oilseed exports are reduced 1.0 million tons to 177.1 million mainly on lower rapeseed trade between Canada and China. With lower rapeseed crush for China, imports are increased for other products, including sunflowerseed meal, rapeseed meal, palm oil, and soybean oil. Global oilseed ending stocks are raised 1.5 million tons to 123.2 million, largely due to higher soybean stocks for Brazil and rapeseed stocks for Canada.

SUGAR: U.S. sugar supply for 2018/19 is decreased 42,457 short tons, raw value (STRV) based on processor-reported reductions to beet sugar production and cane sugar production in Florida. Ending stocks for 2018/19 are projected at 1.625 million STRV, implying a stocks-to-use ratio of 13.2 percent. There are no changes to the 2018/19 Mexico sugar supply and use.

LIVESTOCK, POULTRY, AND DAIRY: The 2019 forecast for total red meat and poultry production is lowered from last month on lower expected beef, pork and broiler production. The beef production forecast is reduced from the previous month primarily on lower carcass weights, but higher total cattle slaughter for 2019 is expected to partially offset declines in carcass weights. Pork production is lowered on a slower pace of slaughter throughout the year, but this decline is partially offset by slightly higher hog weights. USDA's *March Quarterly Hogs and Pigs* report estimated producers farrowed 2 percent more sows during December-February and indicated their intentions to farrow about 1 percent more sows in March-May. These hogs will be ready for slaughter in the second half of 2019. Broiler production is reduced on recent hatchery data and slowing weight growth while turkey production is raised slightly. The 2019 egg production forecast is raised from the previous month as the pace of expansion has been more rapid than previously expected.

For 2019, beef trade forecasts are unchanged from last month. Pork imports remain unchanged from the previous month, but the export forecast is raised on expectations of stronger global demand for U.S. pork products in the second half of the year. These forecasts assume that current trade policies remain in place. No change is made to broiler and turkey export forecasts.

The 2019 cattle price forecast is adjusted to reflect a slightly lower first-quarter price. The hog price forecast is raised from last month but demand in coming quarters is not expected to be as strong as in March and early April. The broiler price forecast is reduced, reflecting a lower first-quarter price, while modest year-over-year gains in turkey prices support a higher price forecast. The egg price forecast is lowered on recent price declines and increased production throughout the year.

The milk production forecast for 2019 is lowered from last month as higher milk cow numbers are more than offset by lower expected growth in milk per cow for the year. The 2019 fat basis import forecast is unchanged from last month, but the export forecast is lowered on slower expected shipments of butterfat products and whey products. On a skim-solids basis, the current import forecast is raised on higher imports of milk protein products and a number of other dairy products. The skim-solids basis export forecast is lowered from last month on lower shipments of whey products, lactose, and nonfat dry milk (NDM).

The annual product price forecast for cheese is raised from last month on higher current prices and expected stronger demand. Butter, NDM, and whey prices are reduced from the previous month on current prices and expected weaker demand. The Class III price is raised on the

higher cheese price forecast while the Class IV price is reduced on lower NDM and butter price forecasts. The all milk price forecast is raised to \$17.25 to \$17.75 per cwt.

COTTON: The 2018/19 U.S. cotton supply and demand forecasts show lower consumption and higher ending stocks relative to last month. At 3.1 million bales, U.S. cotton consumption is now forecast to reach its lowest level since the 1890s. Ending stocks are now forecast at 4.4 million bales, a 100,000-bale increase from both the previous 2018/19 estimate and from the current estimate for 2017/18. The season-average farm price is unchanged with a mid-point of 70 cents per pound.

Lower world consumption this month results in higher projected 2018/19 ending stocks, with little net change in the other components of the global balance sheet. World mill use is forecast about 400,000 bales lower this month. A 300,000-bale decline in Turkey—and smaller declines in the United States and Vietnam—more than offset smaller increases elsewhere. Lower imports for India, Turkey, and Vietnam are largely offset by an upward revision for China. Lower exports for India and Burkina Faso are largely offset by Australia and Turkey. Higher production for China is largely offset by a decline for Burkina Faso.

World ending stocks in 2018/19 are forecast about 360,000 bales higher this month, with an increase in China's stocks more than offsetting a decline in stocks outside of China.

Approved by the Secretary of Agriculture and the Chairman of the World Agricultural Outlook Board, Seth D. Meyer, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

APPROVED BY:

ROBERT JOHANSSON
SECRETARY OF AGRICULTURE DESIGNATE

Announcement: Upcoming Changes to the May 2019 World Agricultural Supply and Demand Estimates Report

Starting with the May issue, the following changes will be made to the *World Agricultural Supply and Demand Estimates* Report (WASDE):

- Price range forecasts will be eliminated in favor of single price points for all crops and livestock
- The international Supply and Use tables for crops will include an aggregate value for “World less China,” representing the balance sheet values outside of China.
- The ordering of countries and lists of Major Importers/Exporters will be updated to eliminate outdated aggregations (such as “Former Soviet Union”), and better reflect current trade patterns.

A detailed list of changes, including the tables that will be modified, and a template for the May 2019 tables can be found here <https://www.usda.gov/oce/commodity/wasde/>

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Note: The World Agricultural Outlook Board reviews and approves the World Agricultural Supply and Demand Estimates (WASDE) report. The Board's analysts chair the Interagency Commodity Estimates Committees (ICECs) that prepare the monthly report.

Wheat: William Chambers, ICEC Chair, WAOB, *E-mail:* wchambers@oce.usda.gov
Jennifer Bond, ERS; Andrew Sowell, FAS; Pete Riley, FPAC.

Rice: William Chambers, ICEC Chair, WAOB, *E-mail:* wchambers@oce.usda.gov

Avg. Farm Price (\$/cwt) 1/ 6/ 9/	13.10	17.00	16.10 - 16.90	15.70 - 16.50
California 10/	14.10	20.10	17.80 - 18.80	17.40 - 18.20
Other States 1/	10.10	11.70	11.80 - 12.60	12.00 - 12.40

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2015/16-2.9; 2016/17-3.5; 2017/18-1.4. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The medium/short-grain season-average farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. For example, the average difference between the preliminary California SAFP forecast and the final price has averaged \$0.98 per cwt from 2014/15-2017/18, with a high of \$3.50 per cwt in 2017/18 and a low of -\$0.20 per cwt in 2015/16. 10/ Marketing year beginning October 1.

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, Paraguay, and Uruguay. 4/ China, European Union, Japan, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, Vietnam, and Thailand).

All Milk 3/	16.30	17.65	16.18	16.18	17.00- 17.60	17.25- 17.75

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

WASDE - 587 - 35

Reliability of April Projections 1/

Note: Tables on pages 35-37 present a record of the April projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.5 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 0.8 percent. The average difference between the April projection and the final estimate is 2.1 million tons, ranging from 0.1 million to 6.8 million tons. The April projection has been below the estimate 25 times and above 12 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2017/18 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2017/18. Calendar years 1982 through 2017 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1982-2017.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of the Foreign Agricultural Service. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

World Agricultural Supply and Demand Estimates

WASDE-587 – April 9, 2019

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
